Making Clickable Pictures in Craiglist

1. To make pictures clickable on Craiglist the picture must have a different format, for this example I will use photobucket to make it clickable. Go to Photobucket.com and upload the picture of the given property

- Once you have an account it is time to upload pictures on Photobucket.
- 2. Click the Upload button and select the pictures that you will upload.

3. Click on Save and continue to my album. And you will find the 4 new photos on your album. ⁽²⁾ Now we have to get the html code of the picture so it will appear on Craiglist properly.

- Click Html code (once you click it, it would automatically copy the code)
- 4. Go to Craiglist and paste the Html code of the picture. This should be how it looks like.
